

R-WW90II

GAS POWERED FRAMING NAILER

The new WW90II gas powered nailer is a perfect cordless alternative to the most popular solutions used when fixing in structural timber. It delivers comfort and safety, but also increases efficiency at work.

FEATURES AND BENEFITS

Increased tool power – improved performance for applications using the full length range of nails (50–90 mm)

Lithium-Ion power pack – performance doubled compared to previous solutions

Optional 2-minute fast charging feature enabling you to fix 200 nails more

New design – reliability for long years and significantly easier day-to-day operation and maintenance thanks to a more precise and less complex cleaning mechanism

Convenient, reliable and accurate fixing – keyless nailing depth adjustment for improved precision and ease of use

Excellent balance

BASE MATERIALS

Structural timber

Particleboard

Plywood

Wood

OSB

The WW90 2nd generation gas powered framing nailer is an excellent cordless alternative for fixing in wooden structures, requiring no power cables or compressed air hoses. It ensures mobility, safety and top performance. You can now handle a single fixing point in less than 1 second. With a battery pack whose capacity lasts for 8,000 fixings and the charging time of mere 30 minutes, you receive a full package of outstanding benefits in terms of performance and repeatability of fixing.

APPLICATIONS

Battens and counter battens

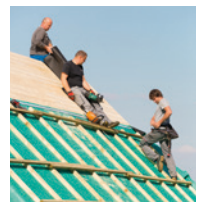

Roof boarding

Framework house structures

Facades and soffits

Formwork fixing

Terraces and arbours

OPERATING INSTRUCTIONS

1. Press the tool against the fixture and base material.
2. Wait a fraction of a second for the gas to be mixed with air.
3. Press the trigger to perform a fixing.
4. Remove your finger from the trigger and retract the tool from the fixing point until there is no contact between the nose and the fixture.
